Emergencies: Anthrax

- NYC Health

Bioterrorism is the deliberate release of

viruses, bacteria,

toxins, or other

agents to cause

illness or death in

people, animals, or

plants. According to

experts, the threat of

global bioterrorism is

increasing. In October

2001, bioterrorism

Bookmark File PDF

Became a reality when letters containing powdered anthrax were sent through the U.S. Postal Service. The attack caused 22 cases of illness, 5 of which resulted in death, and widespread fear.
