There are many brands of interface available to connect a PC to a ham radio transceiver. Often home-brew interfaces are used. They all do essentially the same thing. They key the radio to transmit, pass a signal based on the mode of operation from the PC to the radio, then un-key to go back into receive mode.

With a simple data and radio control interface, your computer and radio form a powerful data terminal. MFJ Enterprises and West Mountain Radio both manufacture popular data interfaces. If you choose to use an external multiple-mode controller for the digital modes, such as the Timewave PK-232 or DSP-599zx, Kantronics KAM, or MFJ-1278B, you need only a terminal program such as Hyperterm, which is built into Windows .

## **How to Choose a Computer for Your Ham Radio Shack - dummies**

These interfaces replace Icom's CT-17. IC-751A, IC-271 A/H, 471 and 1271A. Requires a UX-14 interface or compatible replacement. Look for a 1/8" phone jack labeled REMOTE or something like that on the back of your rig. If you have a UX-14 installed in your radio, all you need is the LCU3-I-USB cable (with a USB jack).
