Discover powerful hidden social "levers" and networks within your company... then, use that knowledge to make slight "tweaks" that dramatically improve both business performance and employee fulfillment! In *People Analytics*, MIT Media Lab innovator Ben Waber shows how sensors and analytics can give you an unprecedented understanding of how your people work and collaborate, and actionable insights for building a more effective, productive, and positive organization. Through cutting-edge case studies, Waber shows how: Changing the way call center employees spent their breaks increased performance by 25% while significantly reducing stress Quantifying the failure of marketing and customer service to communicate led to a more cohesive and profitable organization Tweaking the balance of in-person and electronic communication can enhance the value of both Sensor data can help you discover who your internal experts really are Identifying employees involved in "creative" behaviors can help you promote innovation throughout your business Sensors and simulations can help you optimize your sick-day policies Measuring informal interactions can improve the chances that a merger, acquisition, or "mega-project" will succeed Drawing on his cutting-edge work at MIT and Harvard, Waber addresses crucial issues ranging from technology to privacy, revealing what will be possible in a few years, and what you can achieve right now. In bringing the power of analytics to organizational development, he offers immense new opportunities to everyone with responsibility for workplace performance.

The resurgence of religiosity in post-communist Europe has been widely noted, but the full

spectrum of religious practice in the diverse countries of Central and Eastern Europe has been effectively hidden behind the region's range of languages and cultures. This volume presents an overview of one of the most notable developments in the region, the rise of Pagan and "Native Faith" movements. Modern Pagan and Native Faith Movements in Central and Eastern Europe brings together scholars from across the region to present both systematic country overviews - of Armenia, Bulgaria, the Czech Republic, Hungary, Latvia, Lithuania, Poland, Romania, Russia, Slovenia, and Ukraine - as well as essays exploring specific themes such as racism and the internet. The volume will be of interest to scholars of new religious movements especially those looking for a more comprehensive picture of contemporary paganism beyond the English-speaking world.

Featuring a dictionary and thesaurus combined, the 'Pocket Oxford Dictionary and Thesaurus' provides the essential language reference help you need in a single portable volume.

This collection of articles offers descriptions of the negation system in 16 languages. As not much is known about negation systems in non-European languages, the first aim of the volume is to provide data on various aspects on negation; for all articles these data were collected on the basis of the same questionnaire. Most work on this subject deals with syntactic aspects of

negation; this volume attempts to include pragmatic and semantic issues as well, such as the expression of negative indefinites, interaction of negation and quantifiers, the scope of negation, and the choice of a particular form of negation in cases where there are several ways to express this. For a number of less-known languages descriptions offering a wealth of data are presented here, and in the articles about well-studied languages, new data and analyses of more complicated issues are provided.
