This remarkable volume highlights the importance of Production and Operations Management (POM) as a field of study and research contributing to substantial business and social growth. The editors emphasize how POM works with a range of systems—agriculture, disaster management, e-commerce, healthcare, hospitality, military systems, not-for-profit, retail, sports, sustainability, telecommunications, and transport—and how it contributes to the growth of each. Martin K. Starr and Sushil K. Gupta gather an international team of experts to provide researchers and students with a panoramic vision of the field. Divided into eight parts, the book presents the history of POM, and establishes the foundation upon which POM has been built while also revisiting and revitalizing topics that have long been essential. It examines the significance of processes and projects to the fundamental growth of the POM field. Critical emerging themes and new research are examined with open minds and this is followed by opportunities to interface with other business functions. Finally, the next era is discussed in ways that combine practical skill with philosophy in its analysis of POM, including traditional and nontraditional applications, before concluding with the editors' thoughts on the future of the discipline. Students of POM will find this a comprehensive, definitive resource on the state of the discipline and its future directions.

Management - the pursuit of objectives through the organization and co-ordination of people - has been and is a core feature, and function, of modern society. Some 'classic' forms of corporate and bureaucratic management may come to be seen as a prevalent form of organization and organizing in the 20th century, and in the post-Fordist, global, knowledge driven contemporary world we are seeing different patterns, principles, and styles of management as old models are questioned. The functions, ideologies, practices, and theories of management have changed over time, as recorded by many scholars; and may vary according to different models of organization; and between different cultures and societies. OThe purpose of this Handbook is to analyse and explore the evolution of management; the core functions and how they may have changed; its position in the culture/zeitgeist of modern society; the institutions and ideologies that support it; and likely challenges and changes in the future. This book looks at what management is, and how this may change over time. It provides an overview of management - its history, development, context, changing function in organization and society, key elements and functions, and contemporary and future challenges.

'Lonely Young Officer, up to his neck in Flanders mud, would like to correspond with young lady (age 18-20), cheery and good looking.' 1916 'Discreet, attractive couple 21 and 25 wish to meet couples and singles 21-35 for exciting and fun-loving adult relationships. Open-minded but not way out. No prejudices. Full length photo, address, and detailed letter assures same.' 1969 From the 'sporty' girls and 'artistic' boys of the Edwardian era to the 'lonely' soldiers of the Great War, the marriage bureaux of the fifties, and on to the internet dating sites of today, Classified tells the story of those who used personal ads to search for love, friendship, marriage and adventure.
