No.3, June 30, For
2019. ABSTRACT:
Detecting genotype-
by-environment
(GE) interaction
effects or yield
stability is one of
the most important
components for
crop trial data
analysis, especially
in historical crop
trial data. However,
it is statistically

Read Free

Statistical

challenging to discover the GE interaction effects because many published data were just entry means under each environment rather than repeated field plot data.
