Structure Function Of The Body

The human body is a complex system with structures ranging from cells to organ systems and functions ranging from waste removal to protection and defense. The structures and functions are dedicated...

Basic Structures & Functions of the Human Body - Video ...

Bones, tendons, ligaments, and cartilage are connective tissue. Blood is a form of connective tissue. • Muscle tissue stretches and contracts to let the body move. • Nerve tissue receives and carries impulses to the brain and back to body parts. Groups of tissue with the same function form organs.

9. Body structure and function | Nurse Key

Synopsis. Simple and straightforward, this introductory text provides a clear approach to learning the difficult concepts of anatomy and physiology. It focuses on two unifying themes the normal structure and function of the human body, and what the body does to maintain homeostasis. Building on the solid foundation of previous editions, this book adds a visual emphasis with realistic animations on a companion CD-ROM and A Clear View of the Human Body, a full-color, semi-transparent insert ...
